

SURAKSHA

9380331566 | surakshaganesh2827@gmail.com | LinkedIn | GitHub | Portfolio

Computer Science – Cyber Security Engineering student. Developed projects web-based applications showcasing adaptability and technical expertise. Experienced in hackathon technical management and demonstrating leadership, problem solving and initiative.

PROFESSIONAL EXPERIENCE

Edunet Foundation Jan 2025 – Feb 2025

Cyber security |Certificate|

- Improved understanding of cyber threats and digital security by 70% through real-world simulations and mentorship.
- Gained hands-on experience in incident response, network monitoring, and threat analysis using industry tools.

Varcons Technology PVT LTD

Oct 2023 – Dec 2023

Java Development |Certificate|

- Gained hands-on experience in Java by building a Typing Speed Calculator and improving code efficiency by 30%.
- Strengthened understanding of software design and client specifications by identifying and preparing detailed reports, enhancing core Java skills by over 40%.

EDUCATION

ACS College of Engineering

2022 - 2026

Course: Computer Science and Engineering in Cyber Security

Recent CGPA = 8.5

PROJECTS

Eco Drive: AI-Powered Traffic and Emission Optimizer

[|Live|](#) [|Source Code|](#)

- Built an AI-driven web app using Python, Scikit-learn, and Streamlit to predict traffic congestion and carbon emissions for optimized route selection also built an AI chatbot using OpenAI.
- Applied data preprocessing & visualization (Pandas, NumPy, Plotly) and containerized the app with Docker for scalable deployment.

AI-Powered Web Application Vulnerability Scanner (Ongoing)

- Developing an AI-driven web vulnerability scanner that leverages machine learning for anomaly detection, maps findings to OWASP Top 10 vulnerabilities, and generates automated PDF security reports with NLP-based remediation suggestions to strengthen web application security.

Phishing URL Detector

[|Source Code|](#)

- Built a phishing detection web app using Flask and Python and a trained Random Forest model, achieving 85% detection accuracy with 48 URL-based features.
- Enhanced user experience by adding input validation and visual prediction indicators improving usability by 70%.

Gym Website

[|Source Code|](#)

- Built a full-stack gym management app using HTML, CSS and SQL.
- Implemented user registration/login and a session booking system. Designed a responsive and user-friendly interface.

SKILLS

- Programming and Version Control:** HTML, CSS, Java(core), Python (Machine Learning), SQL, Git, GitHub
- Data and Analytics:** Power BI, Data Cleaning (Python), Data Visualization
- Cyber Security & Networking:** Vulnerability Assessment, Penetration Testing, Network Security, TCP/IP, LAN, WAN, Firewall, VPN, Network Architecture
- Tools:** Kali Linux, Wireshark, Nmap, SIEM
- Soft Skills:** Problem-solving, Resilient, Team Leadership, Communication, Learning Agility and Adaptability

CERTIFICATIONS

- Student Development Program on Cyber Security (15 days, 30 hours) - by EXCEL R
- CompTIA Cybersecurity Analyst+: Cloud Computing & Cybersecurity – Infosys Springboard
- Cyber Security Analyst Job Simulation – TATA Group (Forage)
- Cyber Security fundamentals - IBM-Skills Build
